SKILLS

Languages: Python 3, JavaScript (ES6+), Ruby, HTML5, CSS3, SQL
Front-End: JavaScript, TypeScript, React, HTML5, CSS3, Bootstrap, Tailwind, React-Redux
Back-End: Django 4, FastAPI, Ruby on Rails, Docker, PostgreSQL, MongoDB, Next.js
System Design: Monoliths, Microservices, Domain-driven design, Message passing, Containerization

PROJECTS

DirectRep
November 2022 - December 2022
· An app to contact politicians through AI-generated letters based on the user's view on specific issues.
· Leveraged GPT-3 API to generate a letter body on a given stance on an issue.
· Returned localized representative results utilizing Google's Civic Information API

Portfolio Site
June 2023 - June 2023
Built a custom portfolio site built using TypeScript, React and Next.js and deployed to Vercel.
· Ensured reactivity and responsiveness by using React and Tailwind CSS to ensure the site adapted to various viewing devices.
· Utilized many 3rd party libraries such as Framer Motion and EmailJS to add custom functionality.

EXPERIENCE

Software Engineer Immersive Resident
Hack Reactor   **March 2023 - Present, Remote**
· Offered personalized one-on-one and small-group support to a cohort of approximately 80 students, assisting them in navigating software engineering concepts and project management strategies to enhance their learning experience.
· Actively participated in weekly check-ins with Cohort Leads and Technical Mentors, sharing observations and insights on student progress and interactions, contributing to the continuous improvement of the educational experience.

Real Estate Associate
Keller Williams Realty, Inc.   **October 2020 - March 2023, Oklahoma**
· Conducted comprehensive market research involving historical property data, comparable property analysis, and building restrictions assessment for properties.
· Collaborated seamlessly within a dynamic real estate team, engaging in multiple daily interactions and coordinating closely with other agents.

Manager
Sub-Culture Group   **January 2019 - October 2020, Florida**
· Successfully managed multiple locations and a team of 20+ staff members overseeing all operational aspects, including food and beverage service, inventory management, and scheduling.
· Developed and implemented a streamlined nightly accounting process, leading to substantial cost savings of thousands of dollars per week.

General Manager
Brewhouse Gallery   **January 2018 - January 2019, Florida**
· Managed the diverse operations of a one-of-a-kind establishment, blending a craft beer bar, local art gallery, and live music venue. Oversaw bar staff, inventory, social media marketing, and the coordination of local artists/musicians.
· Successfully managed the scheduling and execution of weekly music lineups and large-scale events, such as the Anniversary Block Party featuring 20+ live bands, vendors, and attractions.

CERTIFICATIONS

Software Engineering with JavaScript and Python
Hack Reactor · 2022
Certified in building full-stack web applications and various software engineering concepts.

EDUCATION

Coursework in Computer Science
Oklahoma State University · 3.2 · Stillwater, OK · 2015
